OBJECTIVE

web development, and AI technologies. Hands-on experience in developing full-stack web applications and AI-powered solutions using React, Spring Boot, Node.js, Next.js, and MongoDB. Passionate about problem-solving, software development, and continuous learning, with the ability to quickly adapt to new technologies and contribute effectively in collaborative environments

EDUCATION

B.E / Computer Science Engineering (Artificial Intelligence & Machine Learning)	2022 - 2027 CGPA- 8.24
---	---------------------------

V.S.B Engineering College,Karudayampalayam, Karur, Tamil Nadu-639111

HSC / BIO-MATHEMATICS	2022 - 2023 73.5%
------------------------------	----------------------

Nadar Saraswathi Girls Hr. Sec. School, Theni, Tamil Nadu -625531

TECHNICAL SKILLS

Programming Languages: Java, Python,SQL

Web Technologies: HTML, CSS, JavaScript, React

Database: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code

Core Subjects: Data Structures And Algorithm, Operating Systems, Artificial Intelligence, Machine Learning, Object-Oriented Programming, Cryptography and cyber Security.

PROJECTS

BotTrainer – NLU Model Trainer (LIVE)

Built an AI-powered web application for natural language query processing with an interactive interface and Python backend.

Tech Stack: Next.js, React, TypeScript, Python, Drizzle ORM , Node.js, REST APIs, Git,Render.

MarketReply AI – Marketplace Buyer-Reply Assistant (LIVE)

Built a full-stack AI web application that analyzes buyer messages against seller-defined pricing and negotiation rules, using Gemini to auto-draft context-aware replies, with JWT-secured multi-user seller accounts and a live seller directory.

Tech Stack: React, Vite, Tailwind CSS, Spring Boot, Java, MongoDB Atlas, Google Gemini API, JWT Authentication, REST APIs, Git, Render.

Blood Donor Management System (LIVE)

Developed a full-stack web application connecting donors, patients, and hospitals to streamline blood request fulfillment through a role-based approval workflow.

Tech Stack: Node.js, Express.js, MongoDB, JWT, HTML, CSS, JavaScript, Git, Render.

INTERNSHIPS

Virtual Intern – Infosys Springboard 6.0 (2025) - Engaging in structured virtual internship modules focused on industry-relevant technical skills. - Working on practical learning activities aligned with real-world applications.

CERTIFICATIONS

Introduction to Machine Learning – NPTEL

Introduction to prompt engineering -simple learn/skillup

Introduction to IoT and Digital Transformation- NASSCOM, Cisco Networking Academy

Data Science For Beginners-Board Infinity.

Foundation of java-Infosys SpringBoard,

Generative Ai-Nasscome&aws

SOFT SKILLS

Quick Learner | Adaptability | Time Management | Team Work
